

DEV GOTH

Ottawa, ON | (343) 558-3217 | devgothi9@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering Technology student and founder of a deployed full-stack SaaS platform, with experience in full-stack development, AI automation, data analysis, and IT support. Proficient in Python, Java, JavaScript, SQL, and Next.js.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, GoLang, SQL, C, C++, Bash

Web Development: Next.js 14 (App Router), React, HTML5, CSS3, Tailwind CSS, REST APIs, Progressive Web Apps (PWA)

Data & Analytics: PostgreSQL, MySQL, Supabase, Pandas, NumPy, Excel (Pivot Tables, VLOOKUP), Power BI, Tableau, dashboards & reporting

AI & Automation: LLM API integration (OpenAI, Anthropic), prompt engineering, AI agent workflows, automated reporting, n8n, Zapier

DevOps & Tools: Docker, Kubernetes, Git, Bitbucket, Vercel, VMware (Linux, CentOS, RedHat), ITSM/Jira, Agile

Other: Stripe API (Subscriptions, Webhooks), pytest, JUnit, MVC, NetConf/YANG, SNMP, SEO (Search Console, IndexNow), Blender

EXPERIENCE

Founder & Full-Stack Developer | *SafeSpace – Anonymous Mental Wellness Platform* January 2025 – Present

- Designed, built, and deployed a production anonymous wellness platform on Next.js 14, Supabase, and Vercel, with real-time messaging and Row Level Security policies enforcing data privacy.
- Engineered an AI-powered journal coach and automated weekly mood reports that analyze user entries and surface personalized emotional insights.
- Integrated Stripe for a freemium subscription model with regional pricing across 8 currencies, including webhook handling and free-trial management.
- Drove organic discoverability through SEO (Search Console, IndexNow) and shipped the product as a PWA on Vercel edge functions.
- Submitted the Android build to the Google Play Store; the application is currently under review for public release.

IT Service Desk Co-op Student | *Muskoka Algonquin Healthcare, ON* January 2025 – December 2025

- Provided first-line technical support to 200+ staff, resolving hardware, software, and network issues remotely.
- Troubleshooted Active Directory, VPN connectivity, and printer configuration issues, minimizing downtime for clinical staff.
- Documented tickets and resolutions in the ITSM system, expanding knowledge base coverage for recurring issues.

Peer Tutor – Calculus & DBMS | *Algonquin College, Ottawa, ON* May 2024 – December 2024

- Tutored 15+ students per semester in Calculus and DBMS, covering relational design, SQL, normalization, and data modeling.

PROJECTS

Smart ScanMart | *Computer Vision–Based Retail Checkout System* In Progress

- Building a smart retail checkout system that uses in-store cameras and computer vision to identify products in a cart, eliminating manual barcode scanning.
- Designing a real-time cart interface and inventory integration that update item totals and stock levels as customers add or remove products.

Invoice Validator | *Automated Invoice Verification Tool*

- Built an automated tool that parses uploaded invoices and flags mismatched totals, missing tax fields, and duplicate entries.
- Delivered line-by-line error reports, reducing manual invoice review time before submission.

EDUCATION

Algonquin College, Ottawa, ON

Expected Graduation: 2027

Computer Engineering Technology – Computing Science

- Relevant Coursework: Data Structures, Discrete Structures, DBMS, Software Engineering, Calculus

LEADERSHIP & ACTIVITIES

- Co-Head Coordinator, National-Level Tech-Xtreme Event; Event Coordinator for multiple college tech fests.
- Volunteered delivering foundational education and mentorship sessions to underprivileged children.
